# TRANSFORM

Evolve Transform reinvents body sculpting and muscle toning, delivering a highly efficacious, no downtime treatment for all body types.

## QUICKLY TRANSFORM THE SHAPE OF YOUR BODY

*Achieve the toned and refined look you have always wanted.*

### WHAT IS TRANSFORM?

Transform is an innovative hands-free procedure that builds and strengthens muscles while enhancing the appearance of your skin. This non-invasive treatment is a zero downtime alternative for sculpting and refining your body in the comfort of your provider's office.

### HOW DOES TRANSFORM WORK?

Transform provides two procedures in one visit. Radiofrequency energy (RF) for deep heating of tissue and fat, and electrical muscle stimulation (EMS) to induce forced muscle contractions that are not achievable during workouts. The combination allows you to improve your physique quickly and painlessly.

### WHAT CAN I EXPECT DURING THIS TREATMENT?

During your procedure you can expect a warming of your skin and the contraction of the muscles in the specific area being treated.

### HOW SAFE IS THE TREATMENT?

Transform is recommended for patients who are seeking a non-invasive treatment to treat skin and sculpt muscles. It is a safe and effective treatment that can be done in as little as 30 minutes. During treatments, the body's temperature is constantly monitored with real-time updates. The hands-free design and intelligent programmable technology make this an ideal social distancing treatment, allowing for a reduction in patient-physician contact during procedures.

### HOW MANY SESSIONS ARE RECOMMENDED?

Your practitioner will recommend the optimal number of sessions to be performed based on your personal objectives. Treatment times and frequency will be customized to address your specific needs, so the end result is a slimmer, toned appearance.

### WHAT KIND OF POST PROCEDURE CARE IS REQUIRED?

There is zero downtime associated with Transform. It is a quick and painless treatment that can be done over your lunch time, allowing you to return to your normal activities immediately. Patients may notice redness and warmth in the treated area which will subside after a few hours.
